Introduction

Epyt is a simple but nice theme for Beamer, with the following features:

- simple structure: with page numbers at footer, no head bar and side bar;
- simple templates: possible to display theorems with traditional inline style;
- simple colors: using only several foreground and background colors.
Getting the Theme

Epyt theme is contained in major TeX distributions.

- In MiKTeX as `beamertheme-epyt` package.
- In TeXLive as `beamertheme-epyt` package.

You could install `epyt` in the package manager.
Getting the Theme

Epyt theme is contained in major TeX distributions.

- In MiKTeX as `beamertheme-epyt` package.
- In TeXLive as `beamertheme-epyt` package.

You could install `epyt` in the package manager. Also you could download `epyt` from CTAN.
Getting Started

The following code is a minimal example using \texttt{epytheme} theme.

\begin{verbatim}
\documentclass{beamer}
\usetheme{epytheme}
\begin{document}
  \begin{frame}{Hello}
    Hello Beamer!
  \end{frame}
\end{document}
\end{verbatim}
Customization

Epyt theme provides a number of styles, which can be set in loading the theme.

\usetheme[style=gamma]{epyt}
Customization

Epyt theme provides a number of styles, which can be set in loading the theme.

\usetheme[style=gamma]{epyt}

The style could also be changed in the middle of the presentation.

\epytssetup{style=beta}
Available Styles

All available styles are listed here.

alpha  white text in black background
beta   black text in white background
delta  white text in blue background
gamma white text in green background
zeta   white text in red background
Available Styles

All available styles are listed here.

- **alpha**: white text in black background
- **beta**: black text in white background
- **delta**: white text in blue background
- **gamma**: white text in green background
- **zeta**: white text in red background

And the default style is **beta**, which is what you see up to now in this presentation.
Predefined Colors

For each style, five accent colors are predefined. With current style, they are the followings.

\texttt{acolor1 \ acolor2 \ acolor3 \ acolor4 \ acolor5}
Predefined Colors

For each style, five accent colors are predefined. With current style, they are the followings.

```
acolor1 acolor2 acolor3 acolor4 acolor5
```

Also five filling colors are predefined for each style.

```
fcolor1 fcolor2 fcolor3 fcolor4 fcolor5
```
Predefined Colors

For each style, five accent colors are predefined. With current style, they are the followings.

acolor1  acolor2  acolor3  acolor4  acolor5

Also five filling colors are predefined for each style.

fcolor1  fcolor2  fcolor3  fcolor4  fcolor5

These colors are useful when you are drawing a tikz picture.

Predefined Colors

Five accent colors are predefined for this style.

acolor1  acolor2  acolor3  acolor4  acolor5

Also five filling colors are predefined for this style.

fcolor1  fcolor2  fcolor3  fcolor4  fcolor5
Example

Example 1 Prove the following result:

$$\lim_{x \to 0} \frac{\sin 3x}{\ln(1 - 2x)} = \frac{3}{2}$$
Example 1  Prove the following result:

\[
\lim_{x \to 0} \frac{\sin 3x}{\ln(1 - 2x)} = \frac{3}{2}
\]

Proof.  Since \(\sin 3x \sim 3x\) and \(\ln(1 - 2x) \sim -2x\), we have

\[
\lim_{x \to 0} \frac{\sin 3x}{\ln(1 - 2x)} = \lim_{x \to 0} \frac{3x}{-2x} = -\frac{3}{2},
\]

and we are done. \(\square\)
