Abstract
Bibliographical style called nottsclassic which works according to the guideline of the Classics Department of the University of Nottingham (GB).

1 Usage
The name of the bib\LaTeX\-style is nottsclassic has to be activated in the preamble.
\begin{verbatim}
\usepackage[style=nottsclassic,\%
  \hspace{1cm} (further options)\}{biblatex}
\bibliography{bib-file.bib}
\end{verbatim}

At the end of your document you can write the command \texttt{\textbackslash printbibliography} to print the bibliography. Further information are found below (section 3).

2 Overview
\begin{verbatim}
\cite\[\langle\textit{prenote}\rangle\langle\textit{postnote}\rangle\langle\textit{bibtex-key}\rangle\]
\end{verbatim}

\texttt{\langle\textit{prenote}\rangle} sets a short preliminary note (e.g. "e.g.") and \texttt{\langle\textit{postnote}\rangle} is usually used for page numbers. If only one optional argument is used then it is \texttt{\langle\textit{postnote}\rangle}.
\begin{verbatim}
\cite\[\langle\textit{postnote}\rangle\langle\textit{bibtex-key}\rangle\]
\end{verbatim}

The \texttt{\langle\textit{bibtex-key}\rangle} corresponds to the key from the bibliography file.
\begin{verbatim}
\cites\[\langle\textit{bibtex-key}\rangle\]
\end{verbatim}

If one wants to cite several authors or works a very convenient way is the following using the \texttt{\cites\-command}:

\*The development of the code is done at https://github.com/LukasCBossert/biblatex-nottsclassic.

Sometimes a citation has to be put in parentheses. Therefore we implemented the command `\parencite`:

\parencite{(postnote)}{(bibtex-key)}

This cite command takes care of the correct corresponding parentheses and brackets. Especially in `@Inreference` citations the parentheses are changing to (square) brackets.

Of course there is also the possibility to cite several authors/works in parentheses. This is done with `\parencites`:

\parencites{(pre-prenote)}{(post-postnote)}{(prenote)}{(postnote)}{(bibtex-key)}%
\parencites{(prenote)}{(postnote)}{(bibtex-key)}%
\parencites{(prenote)}{(postnote)}{(bibtex-key)}% 

Furthermore and additionally to the ›normal‹ `\cite`-commands one can also cite only the author or the work title in the text and in the footnotes.

`\citeauthor` and `\citetitle`

and for the works

`\citetitle{(prenote)}{(postnote)}{(bibtex-key)}`

3 Bibliography

But first we define the heading of the whole bibliography:

\printbibheading
\printbibliography
\printbibliography{title={Bibliography}}%heading=bibnumbered,% if you want it numbered

You can give any title you would like to give (title = `{(any title)}`).

The next step is to set up the bibliography for the ancient authors.

Finally the bibliography:

\printbibliography{title={Secondary literature}}%heading=subbibnumbered,% if you want it numbered
   %heading=subbibnumbered,% if you want it numbered
   title={Secondary literature}}
Bibliography

Secondary literature
