The *pdfcolparcolumns* package

Heiko Oberdiek*

2019/12/29 v1.5

Abstract
Since version 1.40 pdfTeX supports several color stacks. This package uses them to fix color problems in package *parcolumns*.

1 Usage

\usepackage{pdfcolparcolumns}

The package pdfcolparcolumns loads package parcolumns [1]. If color stacks are available then the macros of parcolumns are patched to add support for color stacks.

1.1 Option rulebetweencolor

Package pdfcolparcolumns also fixes the color for the rule between columns (if rulebetween is set). Default color is \texttt{\normalcolor}. But this can be changed by using option rulebetweencolor. It takes a color specification as value. If the value is empty, then the default (\texttt{\normalcolor}) is used. Examples:

\begin{verbatim}
rulebetweencolor=blue,
rulebetweencolor={red},
rulebetweencolor={}, \% \texttt{\normalcolor} is used
rulebetweencolor=[rgb]{1,0,.5} \% see below
\end{verbatim}

If used inside the optional argument of environment parcolumns and the value contains an optional argument, then whole value must be put in curly braces:

\begin{verbatim}
\begin{parcolumns}
  \rulebetween,
  rulebetweencolor=[rgb]{1,0,.5},
\end{parcolumns}
\end{verbatim}

This option rulebetweencolor can also be set using \texttt{\setkeys}:

\texttt{\setkeys{parcolumns}{rulebetweencolor=green}}

1.2 Future

Currently package parcolumns does not seem to be maintained. Nevertheless if there will be a new version that adds support for color stacks, then this package may become obsolete.

2 Implementation

2.1 Identification

\begin{verbatim}
1 (*package)
2 \NeedsTeXFormat{LaTeX2e}
3 \ProvidesPackage{pdfcolparcolumns}[]
4 [2019/12/29 v1.5 Color stacks for parcolumns (H0)]
\end{verbatim}

2.2 Load packages

2.2.1 Package parcolumns

Currently package parcolumns does not define options. Thus it is just a precaution that the options of package pdfcolparcolumns are passed to package parcolumns.

\begin{verbatim}
5 \DeclareOption*{\%}
6 \PassOptionsToPackage{\CurrentOption}{parcolumns}\%}
7 }
8 \ProcessOptions\relax
9 \RequirePackage{parcolumns}[2004/11/25]
\end{verbatim}
2.2.2 Package pdfcol

\RequirePackage{pdfcol}[2007/09/09]
\ifpdfcolAvailable
\PackageInfo{pdfcolparcolumns}{%
  Loading aborted, because color stacks are not available%
}%
\expandafter\endinput
\fi

2.2.3 Package infwarerr

\RequirePackage{infwarerr}[2007/09/09]

2.3 Color stack macros

\pcpc@MaxStack

Macro \pcpc@MaxStack holds the highest number of allocated stacks.
\global\chardef\pcpc@MaxStack=\z@

\pcpc@InitStacks

Macro \pcpc@InitStacks takes the number of columns as argument and ensures
that there are enough color stacks for all columns.
\def\pcpc@InitStacks#1{%
  \begingroup
  \count@\pcpc@MaxStack
  \loop
    \advance\count@\@ne
    \pdfcolInitStack{pcpc@\the\count@}%
  \ifnum#1>\count@
    \repeat
  \global\chardef\pcpc@MaxStack=\count@
  \endgroup
}\fi

\pcpc@SwitchStack

\def\pcpc@SwitchStack#1{%
  \pdfcolSwitchStack{pcpc@\number#1}%
}\pcpc@SetCurrent

\def\pcpc@SetCurrent#1{%
  \pdfcolSetCurrent{pcpc@\number#1}%
}\fi

2.4 Patches

Now the color stack macros are patched into the macros of package parcolumns.

2.4.1 Init stacks

\pcpc@InitStacks should go into the definition of environment parcolumns.
\pc@alloccolumns is executed there and nowhere else, thus we hook into it.
\g@addto@macro\pc@alloccolumns{%
  \pcpc@InitStacks\pc@columncount
}%
2.4.2 Switch stack

`\pcpc@SwitchStack` should be called by `marco \colchunk@`. However, it is easier to patch `\pc@setcolumnwidth` that is executed in `\colchunk@` only.

\begin{verbatim}
\g@addto@macro\pc@setcolumnwidth{%
\pcpc@SwitchStack\pc@columnctr
}
\end{verbatim}

2.4.3 Set current stack color

`\pcpc@SetCurrent` is set at the begin of each line. It must be inserted into `\pc@placeboxes`. Unfortunately, there is no easy way. Therefore, we check and redefine `\pc@placeboxes`.

\begin{verbatim}
\begingroup
\def\x{%
  \global\let\@tempa\relax
  \count@\z@\hb@xt@\linewidth{%
    \vfuzz30ex \vbadness\@M \splittopskip\z@skip
    \loop
      \ifnum\count@<\pc@columncount
        \advance\count@\@ne
        \expandafter\ifvoid\csname pc@column@width\number\count@\endcsname
          \hskip\csname pc@column@width\number\count@\endcsname
        \else
          \expandafter\setbox\expandafter\@tempboxa\expandafter
            \vsplit\csname pc@column@width\number\count@\endcsname
            \vbox{\unvbox\@tempboxa}
        \fi
      \else
        \global\let\@tempa\pc@placeboxes
      \fi
      \ifnum\count@<\pc@columncount
        \strut\hfill \ifpc@rulebetween \vrule \hfill \fi
      \fi
    \repeat
  \@tempa
}\ifx\x\pc@placeboxes
  \else
    \PackageWarningNoLine{pdfcolparcolumns}{Command \string\pc@placeboxes\space has changed.\MessageBreak Supported versions of package \string\parcolumns':\MessageBreak \space \space \space 2004/08/05.\MessageBreak The redefinition of \string\pc@placeboxes\space may not%\MessageBreak }
\fi
\endgroup
\end{verbatim}
behave correctly depending on the changes
}
\fi
\endgroup
\pc@placeboxes
\renewcommand*{\pc@placeboxes}{% 
\global\let@tempa\relax
\count@\z@
\hb@xt@\linewidth{%

3 Installation

3.1 Download

Package. This package is available on CTAN:\cite{ctan-pdfcolparcolumns}: 
\url{CTAN:macros/latex/contrib/oberdiek/pdfcolparcolumns.dtx} The source file.
\url{CTAN:macros/latex/contrib/oberdiek/pdfcolparcolumns.pdf} Documentation.

Bundle. All the packages of the bundle ‘oberdiek’ are also available in a TDS compliant ZIP archive. There the packages are already unpacked and the documentation files are generated. The files and directories obey the TDS standard.
\url{CTAN:install/macros/latex/contrib/oberdiek.tds.zip}

\textit{TDS} refers to the standard “A Directory Structure for \TeX\ Files” (\url{CTAN:pkg/tds}). Directories with \texttt{texmf} in their name are usually organized this way.

3.2 Bundle installation

Unpacking. Unpack the \texttt{oberdiek.tds.zip} in the TDS tree (also known as \texttt{texmf} tree) of your choice. Example (linux):

\begin{verbatim}
unzip oberdiek.tds.zip -d "/texmf"
\end{verbatim}

3.3 Package installation

Unpacking. The \texttt{.dtx} file is a self-extracting docstrip archive. The files are extracted by running the \texttt{.dtx} through plain \TeX:

\begin{verbatim}
tex pdfcolparcolumns.dtx
\end{verbatim}

\footnote{\url{CTAN:pkg/pdfcolparcolumns}}
TDS. Now the different files must be moved into the different directories in your installation TDS tree (also known as texmf tree):

\begin{verbatim}
pdfcolparcolumns.sty → tex/latex/oberdiek/pdfcolparcolumns.sty
pdfcolparcolumns.pdf → doc/latex/oberdiek/pdfcolparcolumns.pdf
pdfcolparcolumns.dtx → source/latex/oberdiek/pdfcolparcolumns.dtx
\end{verbatim}

If you have a docstrip.cfg that configures and enables docstrip’s TDS installing feature, then some files can already be in the right place, see the documentation of docstrip.

3.4 Refresh file name databases

If your \TeX\ distribution (\TeX\ Live, MiK\TeX, . . .) relies on file name databases, you must refresh these. For example, \TeX\ Live users run texhash or mktexlsr.

3.5 Some details for the interested

Unpacking with \LaTeX. The .dtx chooses its action depending on the format:

plain \TeX: Run docstrip and extract the files.
\LaTeX: Generate the documentation.

If you insist on using \LaTeX for docstrip (really, docstrip does not need \LaTeX), then inform the autodetect routine about your intention:

\begin{verbatim}
latex \let\install=y\input{pdfcolparcolumns.dtx}
\end{verbatim}

Do not forget to quote the argument according to the demands of your shell.

Generating the documentation. You can use both the .dtx or the .drv to generate the documentation. The process can be configured by the configuration file ltxdoc.cfg. For instance, put this line into this file, if you want to have A4 as paper format:

\begin{verbatim}
\PassOptionsToClass{a4paper}{article}
\end{verbatim}

An example follows how to generate the documentation with pdf\LaTeX:

\begin{verbatim}
pdflatex pdfcolparcolumns.dtx
makeindex -s gind.ist pdfcolparcolumns.idx
pdflatex pdfcolparcolumns.dtx
makeindex -s gind.ist pdfcolparcolumns.idx
pdflatex pdfcolparcolumns.dtx
\end{verbatim}

5 History

[2007/07/26 v1.0]
• First version, published in the newsgroup `comp.text.tex` with the name `parcolumns-colorstacks`: “Re: xcolor glitches”\(^2\)

[2007/09/09 v1.1]
• CTAN version, package name renamed to `pdfcolparcolumns`.
• Uses package `pdfcol`.
• Documentation added.
• Test file added.

[2008/08/11 v1.2]
• Code is not changed.
• URLs updated.

[2010/01/11 v1.3]
• Fix for rule color.
• New option `rulebetweencolor` for environment `parcolumns`.

[2016/05/16 v1.4]
• Documentation updates.

[2019/12/29 v1.5]
• `\PassOptionsToPackage` not `\PassoptionsToPackage`
